Extreme energy solutions

Extreme Xtra

GASOLINE FUEL TREATMENT

STABILIZES ETHANOL ISSUES

- LOWER EMISSIONS
- INCREASE MILEAGE
- INCREASE ENGINE PERFORMANCE
- KEEPS ENGINE CLEANER
- TREATS UP TO 140 GALLONS

FOR USE WITH GASOLINE ENGINES ONLY

Made in the USA

US EPA NO # 2181-20001

Extreme Xtra

GASOLINE FUEL TREATMENT

US EPA Reg. Number 2491-20002

Extreme Xtra Gasoline Fuel Treatment is a unique formula of agents that helps break down the covalent bonds of gasoline allowing for better combustion efficiency of fuel. When fuel is burned in a more efficient and complete manner, less parts of the unburned fuel make their way out the tailpipe. The Extreme Xtra also helps clean up engine deposits by loosening engine deposits created by unburned fuel and deposits of materials created by ethanol. It is a very economical way to restore or get better gas mileage, lower emissions, lower vehicle maintenance and keep the engine cleaner.

Extreme Xtra Gasoline Fuel Treatment comes pre-packaged in a **16 oz applicator bottle**.

1oz of Extreme Xtra treats up to 25 gallons of fuel. One bottle treats up to 400 gallons of fuel.

Works with the following Vehicles:

- Cars, Pick-Up Trucks, Vans
- Light Commerical Vehicles, Buses, Trucks
- Motorcycles, Quads, Snowmobiles, Hobby Craft
- Other Gasoline and Diesel Internal Combustion Engines
- Hobby Vehicles: Classic Cars, Race Cars, Custom Rods
- Construction Equipment: Generators, Excavating Equipment
- Landscape Equipment (four stroke only): Mowers, Tillers, etc.
